

Year 1/2 Term 4 UK climate

This term we have been learning all about plants and what they need to make them grow well, especially in our UK climate. We carried out an experiment on this in the classroom. We also went on a walk to the woodlands to find different plants in the wild, as well as naming flowers that we saw in gardens on the way. We have compared plants from different regions and how they have adapted to their climate conditions. We have been looking at the art of William Morris and using his techniques to produce our own Masterpieces.

Our English writing was based around the story The Wild Things. We have also been learning how to play notes on the recorder to play a simple song. We have written our own programs to draw shapes using Turtle on the laptops. Zimmer and Vivaldi class had martial art lessons which they really enjoyed. Price class will have this opportunity next term.
