

Year 6 Spring Term 1

Our topic this term has been The British Empire and the Industrial Revolution. The children started off the topic learning about the Victorians, studying the Victorian timeline and looking at the different events. We learnt about the Victorian workhouses and the torturous conditions inside them, as well as the different laws that were introduced during this era to protect children. We looked at the artist Lowry and his specific technique with only using 5 colours, practiced his iconic stick figures and the fact there were never any shadows to portray the grey, cloudy atmosphere of the cities. In Science, we have been learning all about light, experimenting how it travels in straight lines and how different light rays are affected in different ways.

In music, we have started revisiting our learning of how to play the recorders. Revisiting the different notes and building up to playing a short tune.

Using only 5 colours to create a load of different colours to suit the colours in the pictures was a skill in itself!
