

### Year 3

#### Spring 2– Food and Farming.

Year 3 have been learning all about where food comes from this term. We visited a farm that supplies our local Morrisons with milk. We also looked at food miles and what it means to eat fairtrade. We put this knowledge to use by creating a fairtrade tea party. We shopped in Aldi, cooked our food and then hosted a tea party for our parents.

We also looked at plants this term. We explored what plants need to grow and conducted many experiments including growing our own cress.
