

We have been enjoying reading 'Juniper Jupiter' by Lizzy Stewart. We wrote some superhero sentences about Joop and her search for a sidekick!

We also received a letter from Joop who told us her sidekick had become poorly! We wrote back to Joop thinking carefully about why we could be a good sidekick in the time being!

We really enjoyed our P.E lessons where we have been working on our core and teamwork by playing a variety of parachute games!

We loved having our parents and carers in to join in with our space day celebrations. We made junk model rockets, played board games, built rockets from 2D and 3D shapes and had a wonderful time!

We enjoyed celebrating Lunar New Year by watching lion dances, looking at different Chinese artifacts, exploring numerals written in Chinese. We love learning about different cultures.

We have been very busy in maths:

- Recognising numerals from 1-5
- Quickly subitising different amounts
- Ordering numbers
- Recognising 2D shapes
- Finding missing numbers
- Counting accurately from 0-5

Reception 'To Infinity and Beyond'

Spring 1 Term Summary

We had a fantastic space day this term. We made space passports, took a rocket trip to space, walked on the moon to find a shooting star then landed and tried some lovely astronaut food!

In art we created space pictures in the style of Jackson Pollock. We loved being able to drip and splat the paint all over the black paper and thought carefully about the colours that want to use.

We had the best time visiting the Dome! We learnt all about the different planets in our solar system and met astronaut George who quizzed us on our space knowledge!
