

Year 2 term 3

Greenland Below zero

We have been learning about Greenland. We started by comparing the country to the UK and found them both on maps.

We learnt a lot of information about the animals that live there and how they adapt to the weather conditions.

We studied and researched about explorers from both past and present who have travelled to the Arctic and North Pole. We wrote a blog about a visit to the North Pole.

We shared books—The Pugs of the Frozen North, the Last Polar Bears and the Great Explorer. All of these provided us with exciting imagery and descriptions which we used to help us write our own stories and descriptions.
